## IMPLANT CONCIERGE WORKFLOW

Using surgical guides does not mean that you have to invest a lot of time in planning, designing and manufacturing. Instead, you may work with Implant Concierge, your highly trained Virtual Treatment Plan Coordinator™ delivering everything you need for the desired guided implant placement procedure. On request, it handles the complete guided surgery process – from treatment planning to manufacturing of the surgical guide.

Implant Concierge makes sure that you will never lose control of the procedure: It is up to you to decide whether you upload your own treatment plan or have Implant Concierge do all the planning for you. Moreover, you are the one to select the implant type, to review and approve any proposal, and to specify the type of surgical guide to be produced. If desired, Implant Concierge can also design and fabricate a surgery ready provisional for the case.

#### UPLOAD YOUR DATA

Upload the DICOM files from your CBCT device and, optionally, an STL file of a digital impression. Add the necessary project information, including the implants and surgical kit to be used and the type of surgical guide desired, and place your order.

#### IMPLANT PLANNING PROCEDURE

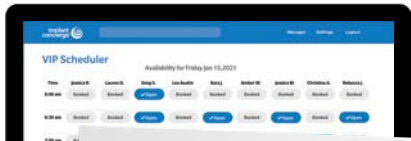

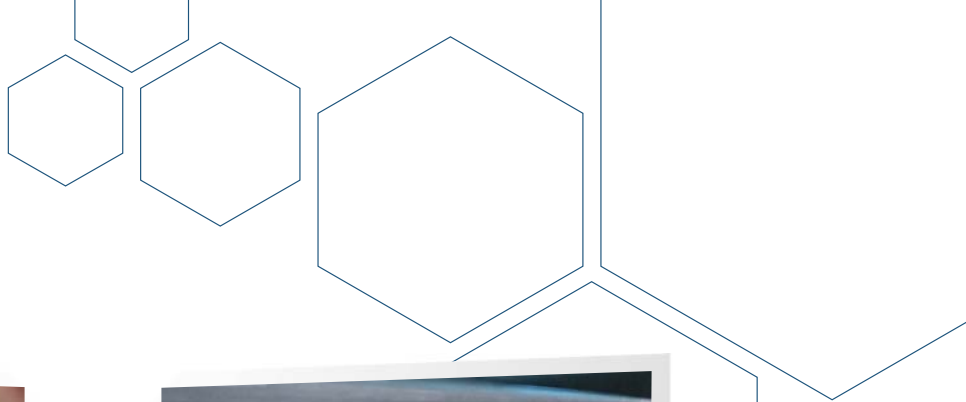

Let a highly trained Virtual Treatment Plan Coordinator create an initial treatment plan proposal. Anatomical structures are respected when the coordinator determines the best possible position for the implants you selected.

### KIT INFORMATION

When submitting a case at [implantconciierge.com](http://implantconciierge.com), you are asked to enter the brand of the surgical kit and implant you are planning to use. This information allows Implant Concierge to ensure a precise fit between the drills to be used and the sleeves embedded into the surgical guide.

### VIRTUAL REVIEW AND APPROVAL

Schedule a one-on-one online session at the desired time. Review, evaluate and discuss the plan with your favorite 3D Case Coordinator. You may request changes and have as many meetings as needed until you are comfortable to approve the case. For single implant cases, an auto approval process is also available.

### SURGICAL GUIDE PRODUCTION

Following your approval, Implant Concierge designs and manufactures the surgical guide with the desired anchor pins and sleeves that perfectly fit the surgical kit selected in the order form. With the surgical protocol and guide, you are ready for the day of surgery.

## BENEFITS

- + Create consistent and predictable outcomes
- + Focus on your clinical work while Implant Concierge does the planning, designing, and manufacturing
- + Skip the learning curve and startup costs of software
- + Experience unparalleled affordable service

# IMPLANT CONCIERGE: YOUR GUIDED SURGERY PARTNER

Engage Implant Concierge at your convenience to lighten your workload. We will assist you with your surgical guide needs to ensure that you experience a precise and minimally invasive guided implant experience.

With Implant Concierge, you will be prepared for every surgery. Experience the confidence and ease of planning and placement with Implant Concierge.
